

# Super Bright LED Rechargeable Solar Shed Lamp

**Model: BSL-P8002M-1**

Note: Please keep the lamp inside when charging.

## Product Information

High light solar shed light is a new version of SOLARLAND's solar lamp. It's a simple and modern solution of night illumination. The 1.5W solar panel is designed to be waterproof, easy for installation. 12 LED design enables the lamp to provide super light intensity than the original solar shed lights.

The wide angle LEDs provide sufficient light to move around a room and the special silver-gilt reflecting plate enhances brightness.

It features fast and easily installed without additional wires. Convenient and environment-friendly, can be widely used in any shed, gazebo, garage, barn or greenhouse even there is no public electricity supply.
