

Our Story...

Is American...it started in Milwaukee, Wisconsin three years ago. Helios was founded with a vision of delivering two things America needs more of, jobs and solar power. We are proud to say that that vision is now reality. Helios is an American manufacturer of photovoltaic modules headquartered in Milwaukee. We founded our company here, we are based here, and we build here.

Our Vision...

Is clear...we believe electricity can be generated in a clean, safe, economical, and sustainable manner. We further believe that solar electricity, which delivers on each of these dimensions, will be a major part of the world's future energy mix and can serve as a driving force behind a renewed American economy.

Our Product...

Is great...we build affordable, reliable, high-performance solar modules for the solar electric industry. What makes our modules great? Great components and great manufacturing know how:

- The best quality mono-crystalline cells that produce top-of-class power. Mono cells are more robust, more efficient and have a longer production life than poly cells
- 4 mm patterned glass versus competitor's 3 mm glass – 1 ½ inch hail resistance
- Tedlar backsheet, not polyester – higher strength and longer life

Our Style...

Is to be there for you...that means we are there to not only answer your calls but your questions as well. We deliver on time to the right location. We help solve your problems.

That is the side you see. We think you will like the side you don't see so often as well. We walk the walk. Our rooftop has a 25 year lease for our own solar array, our office is being certified LEED Silver, we recycle just about everything, we have great benefits for all employees, and we have fun.

Our Door...

Is always open...we invite you to visit our headquarters in Milwaukee, Wisconsin. This is a great opportunity to get to know each other and get a first-hand look at our advanced, automated manufacturing platform. We encourage you to contact us via phone or our online contact form.
