

### Three Reasons to Choose the FXR/VFXR Inverter/Charger Series from OutBack Power:

#### 1. ENGINEERED FOR RELIABILITY

- **Extensive quality and reliability** testing, including Highly Accelerated Life Testing (HALT)
- Available in sealed or vented units with die-cast aluminum chassis
- Designed to operate in the harshest environmental conditions such as high temperatures, humidity or corrosive salt air
- 15 years of experience manufacturing and improving products for fault-intolerant, mission-critical applications
- Standard 5 year warranty (extended 10 year warranty available)

#### 2. DESIGNED FOR FLEXIBILITY

- **Modular, stackable:** up to nine units can be combined for three-phase operation and ten in parallel, single-phase operation
- Seven different programmable operational modes, with generator assist
- Advanced Battery Charging (ABC) programmability accommodates traditional and advanced chemistry batteries
- GridZero operating mode minimizes grid dependence in areas where incentives are changing and utility sell-back is limited
- Sinewave output in 12V, 24V or 48V versions with a typical operating efficiency up to 93%
- **Sealed Models:** 2000VA, 2500VA or 3000VA  
**Vented Models:** 2800VA, 3500VA or 3600VA

#### 3. EASY-TO-INSTALL AND MAINTAIN

- **System configuration is quick** with smart programming wizards
- Integrates both grid and generator with dual inputs
- Complete balance-of-system components available
- Field-serviceable modular design and global technical support
- Monitor, command and control from any internet-connected device with OPTICS RE

### OutBack FLEXpower TWO Typical System Integration (w/ 2 FXR/VFXR Inverter/Chargers):

**OUTBACK POWER — MASTERS OF THE OFF-GRID. FIRST CHOICE FOR THE NEW GRID.**

#### MAKE THE POWER

- FLEXpower Integrated Systems
- Inverter/Chargers & Charge Controllers

#### STORE THE ENERGY

- EnergyCell RE, GH, NC and OPzV Batteries
- Battery Enclosures and Racking

#### MANAGE THE SYSTEM

- OPTICS RE System Monitoring and Control
- MATE3 System Display and Communications

**Power Rating Notes**  
 Inverters that specify power in VA but do not use the unity standard Power Factor (PF) could have misleading power specifications. Volt-Amps (VA) is a total inverter output, while Watts (W) represent the power consumed by the electrical loads. PF, which varies by types of loads, is the ratio of W to VA, and the difference between the two is power in the circuit that does no useful work. At 1.0PF (unity), all power is used. This is the industry-standard used by OutBack Power.

**Instantaneous Power Rating**  
 Most stringent, massive load start **VFXR3648A:** 6000VA  
**Surge Power Rating**  
 Less stringent load start **VFXR3648A:** 5400VA  
**Peak Power Rating**  
 Frequent "heavy duty" load requirements **VFXR3648A:** 4000VA  
**Continuous Power Rating**  
 Sustained "real world" load requirements **VFXR3648A:** 3600VA

**INVERTING** **SELLING**  
**Typical Efficiency Rating**  
 Real world efficiency with variable loads **VFXR3648A:** 93%  
**CEC Efficiency Rating**  
 Most stringent US rating **VFXR3648A:** 91%
